Essential Requirements

The MM Awards Mark Scheme aims to provide students with further information on how best to complete each criterion of the programme.

BEFORE looking into each criterion students **MUST** familiarise themselves with the Supporting Evidence Quality Descriptors, as this will maximise your success on the programme.

Activities undertaken up to 2 years before the level of the award you are applying can be accepted. For example a year 10/s3 starting at Bronze can use activities from year 8/s1 onwards. This does not apply to the extracurricular activities criterion (see mark scheme for further).

Once submissions have been graded and returned, students will not be allowed to resubmit work.
